for a two-hour nationally-televised live event!

Learn about:

- How to experience the August 2017 eclipse through the eyes of NASA
- Views from different areas of the country and how to prepare
- Safe eclipse viewing practices
- What causes an eclipse and why you should care
- How to participate in events around the country
- The unique research opportunities to study our Earth, moon and the sun

For the first time in 99 years, a total solar eclipse will cross the entire nation on Monday, August 21, 2017. Over the course of 100 minutes, 14 states across the United States will experience over two minutes of darkness in the middle of the day. Additionally, a partial eclipse will be viewable across the continent.
